

Kristalia

Boum, designed by Monica Graffeo and Ruggero Magrini, is a swivel stool that's adjustable in height by means of a gas piston. The base is in satin-finish chrome steel while the body is in polypropylene. The upper part of the seat is covered with soft material supplied in two versions: fabric coated with stain-resistant Teflon, or in easy-to-clean semi-matt polyurethane coated fabric. As with the Boum chair, the stool is fitted with a handle covered with the same soft fabric of the upper part of the seat.

Gooding Aluminium

Gooding Aluminium's perforated squeeze frame panels are fronting the new café bar at the Queen Elizabeth Hospital in Welwyn Garden City. Their light and airy feel complements the modern dining area and their smooth metallic finish completes the installation. The material's flexibility and the ease of its maintenance allows Gooding Aluminium to extend its designs to flooring, counters, walls and ceilings. GA's processing facilities enable designers to create products of varying size and detail, making it ideal for corporate premises as well as one-off projects.

Riverside Fabrics

Riverside Fabrics has overhauled and rebranded Hartley, its commercial fabrics collection. Encompassing 700 individual fabric and colour combinations, Hartley offers a large selection of crepes, tweeds, suedes, velours and piece dyed jacquards for use in seating, partitions and screens. Mainstream corporate blues, greys, greens and reds are complemented by an array of vibrant shades and cooler, more contemporary colourways. A range of yarn fibres and specifications are available. Orders can be delivered anywhere in the UK within 24 hours of receipt.

Abode

Alto is a new monostem style model from Abode that has all waterflow controls on the lever valve at the base of the neck spout. Mounted on the side to the lever control is a unit, which is rigid to the spout and thereafter a flexible hose with a hand-operated directional spray at the end. It's compact compared to other models on the market, and is designed to be mounted through the worktop at the rear of the sink.
